About FOSS4G

FOSS4G — Free and Open Source Software for Geospatial

- **Annual global event:** hosted by OSGeo, a non-profit supporting collaborative development of free/open-source geospatial technologies and open data.
- **Packed program:** talks, workshops, social events, B2B networking, job boards, open spaces, code sprints, and direct access to users, maintainers & experts.
- **International & rotating:** moves to a new continent/host city each year offering a regional focus, with a global audience.
 - **2027 host:** Bristol, UK 
 - **Inclusive access:** Discounted tickets for students & community members
 - **Travel grants:** to support attendees who couldn't otherwise attend

Why sponsor

- **Get in front of 800+ attendees:** over 4 days your brand will be visible to an international audience of people who care about geospatial tech.
- **Meet the people who matter:** private-sector leaders, government folks, researchers, startups, and deeply knowledgeable open-source contributors, all in one space.
- **Tap into a growing market:** more organisations are adopting QGIS, PostGIS, GeoServer, and other open-source libraries like GDAL and PROJ are foundational to almost any geospatial application. Companies like Apple, Meta, Microsoft, Uber and Amazon are actively contributing to open-source mapping. Your sponsorship puts you in front of all of them.
- **Show you're part of the community:** not just watching from the sidelines, sponsoring FOSS4G is one of the most credible ways to demonstrate your commitment to open-source software and open data.
- **Demo your products and make connections:** talk to potential customers, partners, and future hires face-to-face. Show what your organisation brings to the geospatial world.
- **Be part of the conversation:** FOSS4G is where the latest ideas in open-source geospatial are discussed, debated, and built. Your brand and employees can sit right alongside that.
- **Keep the ecosystem going:** sponsorship money goes straight back into supporting the open-source geospatial community that so much of the industry relies on.
- **Help people attend:** sponsorship funds reduced-price tickets for students and community members paying out of their own pocket, and supports the travel grant programme, which brings people from underrepresented backgrounds to the conference. The range of perspectives this creates is what makes FOSS4G worth attending.

OSGeo:UK and our Local Organising Committee (LOC)

OSGeo:UK is the local chapter of the Open Source Geospatial Foundation supporting the UK's open geospatial community. As a not-for-profit organisation with formalised relationships with OSGeo, we are dedicated to:

- Establishing a focal point for developers and users of open source geospatial software within the UK for networking and collaboration
- Raising the profile of open source geospatial development within the UK
- Promoting open source geospatial software as a viable choice for all types of users

Our Management Committee consists of elected officers and committee members who meet regularly to advance these aims and deliver community events, from small regional events, yearly national events and hosting the International FOSS4G Conference in 2013 and in 2027.

:

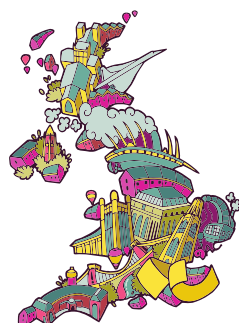

- **FOSS4G 2027 LOC Leadership:**

- Co-chairs: Dennis Bauszus, Paul Wittle, Illya Sparkes
- Treasurer: Jashanpreet Singh

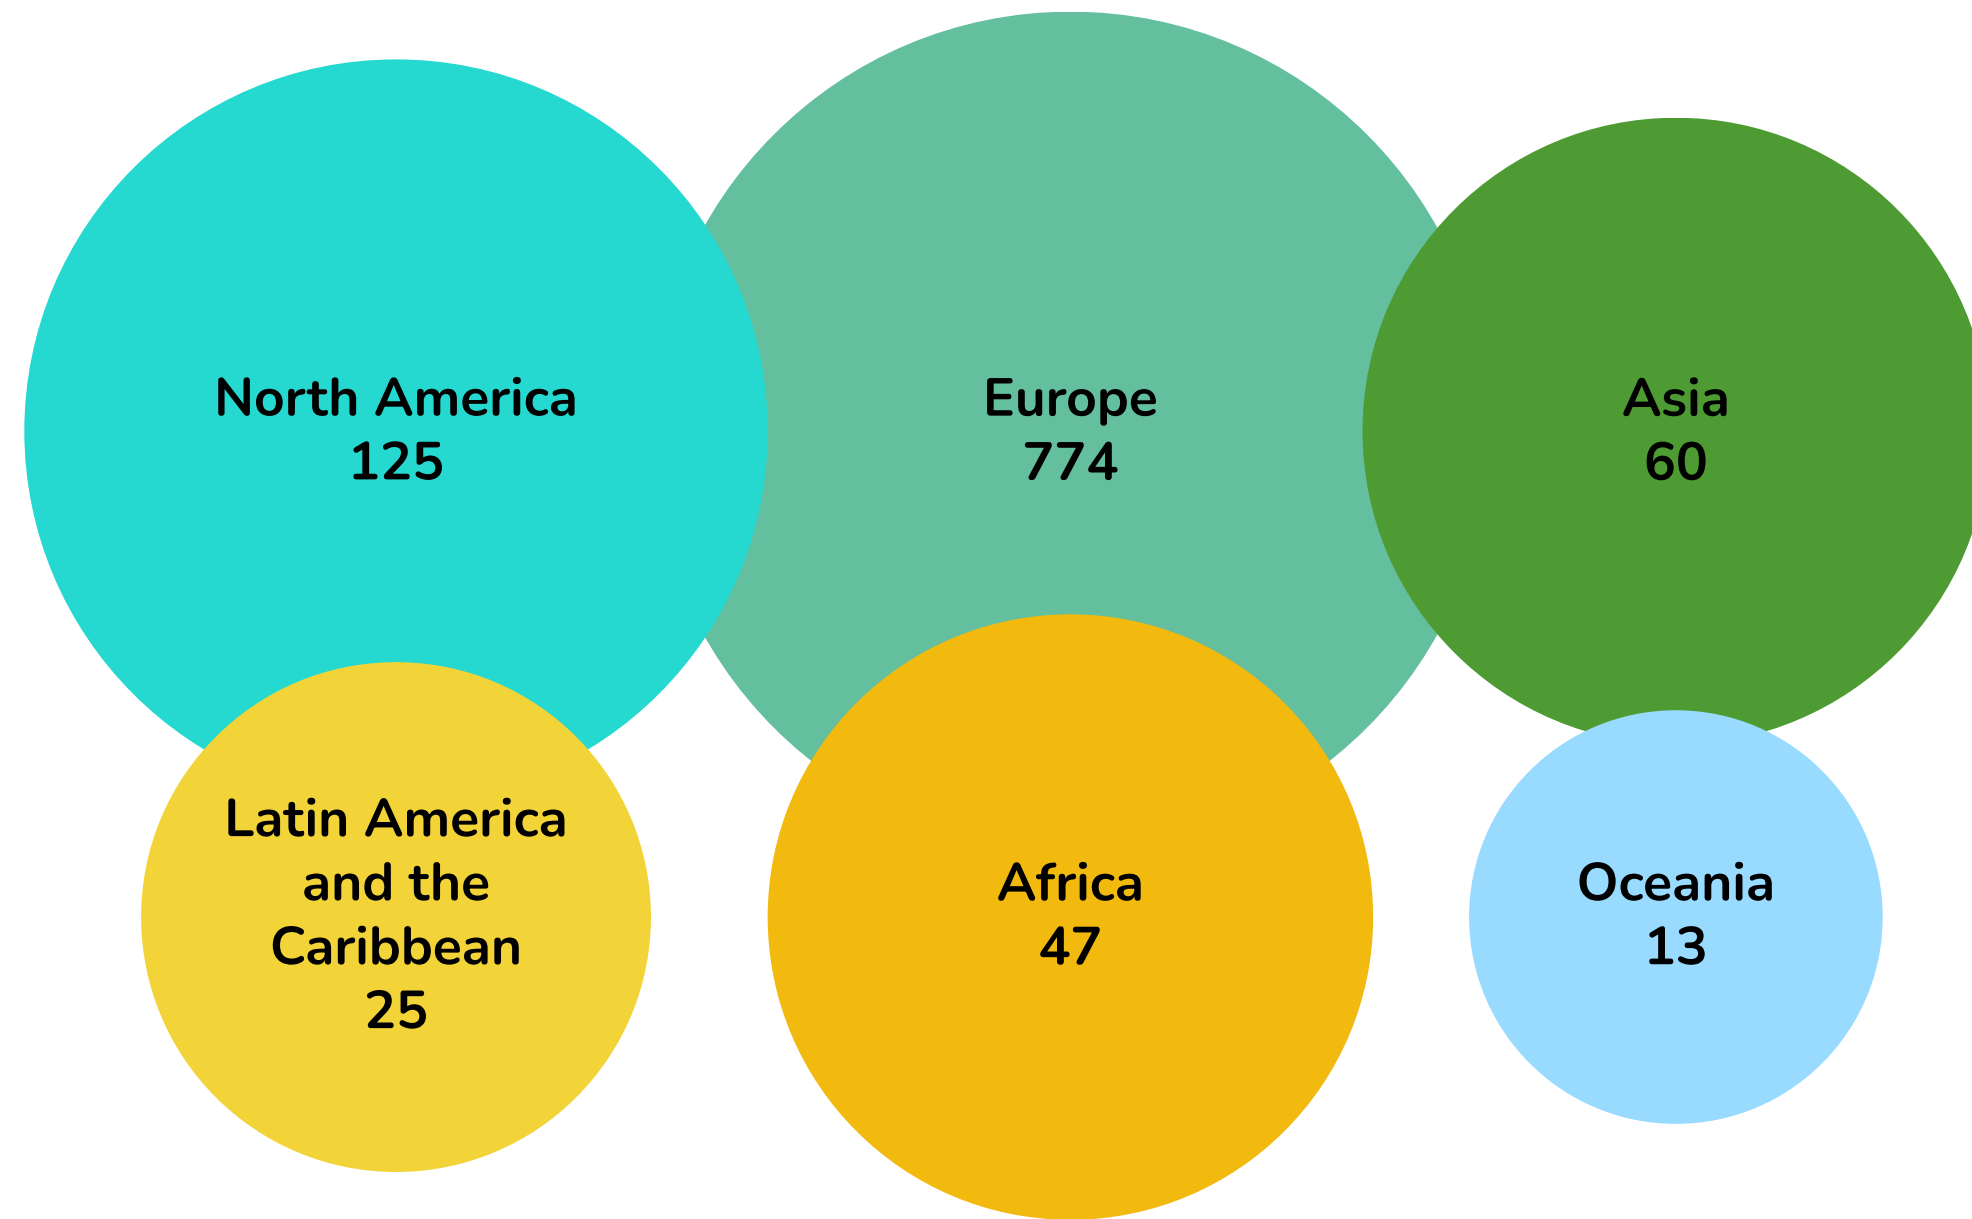

- **OSGeo:UK Committee Leadership:**

- Chair: Nick Bearman
- Secretary: Ant Scott
- Treasurer: Jashanpreet Singh

Who attends FOSS4G?

FOSS4G draws a diverse community ranging from core software engineers, end-users, representatives from international NGOs, business leaders, data analysts, and decision makers.

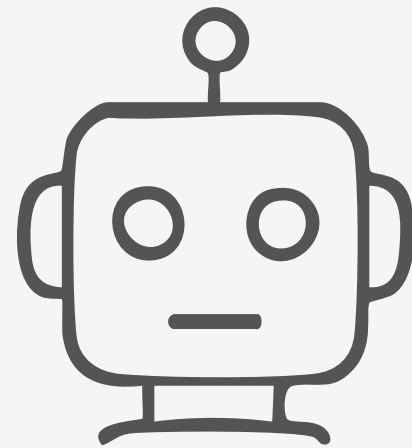

Delegates represent a global Open Source community and FOSS4G events hosted in Europe may attract more than a thousand delegates as shown in the data from FOSS4G 2022 in Firenze [Florence].

We expect active support from the UK and our neighbouring communities. Local chapters in the Netherlands and Germany have already pledged to attend FOSS4G 2027 in large numbers.

Introducing the GEOAI and Cloud Native Tracks

New for 2027 we're offering the opportunity to sponsor our talk tracks on two of the most exciting trending topics within our industry - GEOAI and Cloud Native GEO. Use the opportunity to build name association with these two exciting areas throughout the tracks day.

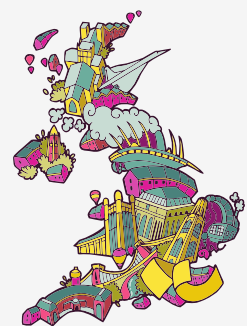

Sponsor the GEO AI track to reach the people turning spatial AI from research into production.

Sponsor the Cloud Geo track to reach the engineers deploying geospatial infrastructure at scale.

You're in good company!

Only a few of our previous amazing sponsors

Welcome to Bristol

- A Sanctuary City in the West Country, with a proud legacy of innovation, from Victorian shipbuilding and steam engineering to the aerospace industry and today's Isambard-AI supercomputer
- European Green Capital (2015), UK's Greenest City (2019), and a UNESCO City of Film (2017)
- Iconic landmarks including Clifton Suspension Bridge, Temple Meads station, and the SS Great Britain
- A vibrant cultural hub, with a packed calendar (Balloon Fiesta, Harbour Festival, St Paul's Carnival & more)

Venue

- The University of Bristol was founded in 1909 and is a member of the prestigious Russell Group
- A vibrant research-led community, proud to host FOSS4G and welcome the global open geospatial community to its campus
- Dedicated to science and engineering, pioneering work on the transistor and radar in the 20th century and now hosting Isambard-AI, the UK's most powerful supercomputer
- Perfectly situated, the University sits in the heart of Bristol city centre, with regular transport links to Bristol Temple Meads Train Station
- Iconic spaces, the neo-Gothic Wills Memorial building will be the heart of the conference with the other conferences spaces a short walk away in University Quarter

B2B Exhibition and Event

- **Central Hub:** Directly connected to or close to all conference spaces, maximum footfall for presentations and networking
- **Frictionless setup:** Same location for event and exhibition space so no requirement to setup in another location for the B2B event
- **B2B Evening:** Open to sponsors, and delegates. Catered refreshments.
- **Ideal for Connection:** Dedicated breakout areas and café space for informal meetings and relationship-building
- **Prime Location:** East Foyer, Chemistry Building, University of Bristol
- **High-Visibility Exhibition:** 10–16 stand spaces, allocated by sponsorship tier
